

One-read search and placement

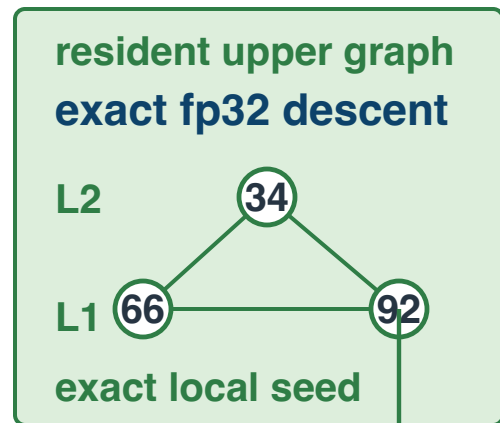

D = 0

c = 1

R bounded

owners striped

(a) resident upper graph

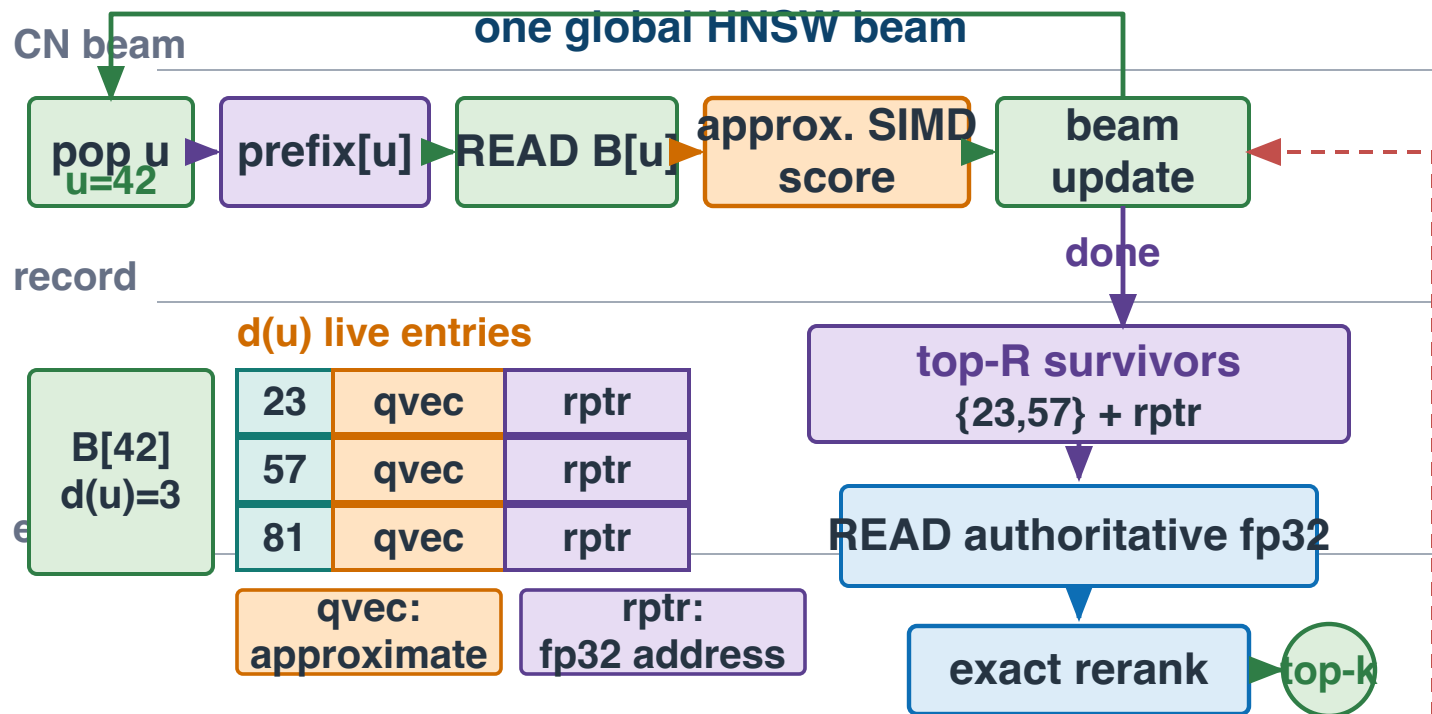

remote level 0
not resident

D: 0 remote READs

replicated per CN
scales with upper graph

(b) one-read expansion

cold fallback

authoritative list/vector path

missing B[96]

L[96]

V[34]

V[66]

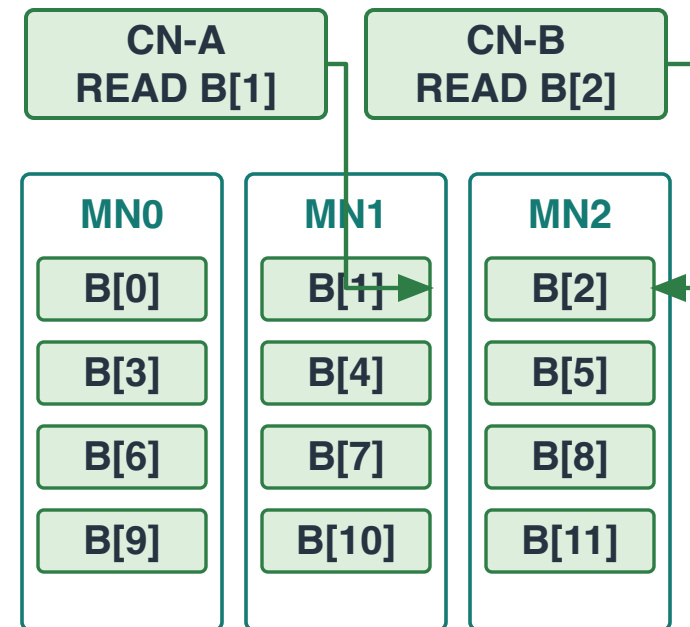

return to beam

(c) block-cyclic placement

owner(u) = u mod S

S=3

no router

each B[u] intact
no split / no inter-MN assembly
